

Central Valley Flood Protection Board Meeting  
December 16, 2016

**The Lower Elkhorn Basin Levee Setback**  
Presented by Jeremy Arrich, DFM, DWR

**BRIEFING SUMMARY**

**Background**

The Lower Elkhorn Basin Levee Setback (LEBLS) is the first multi-benefit flood system improvement project to be implemented by the California Department of Water Resources (DWR) in the Yolo Bypass as part of the Central Valley Flood Protection Plan (CVFPP). This informational briefing is intended to share the status of the project, and highlight potential multi-benefit management actions being considered in and near the project footprint. Opportunities for formal comments will be provided in accordance with CEQA and NEPA. Additional information on the status of the LEBLS can be found in the December 2016 "Report of Activities of the Department of Water Resources," page 21.
